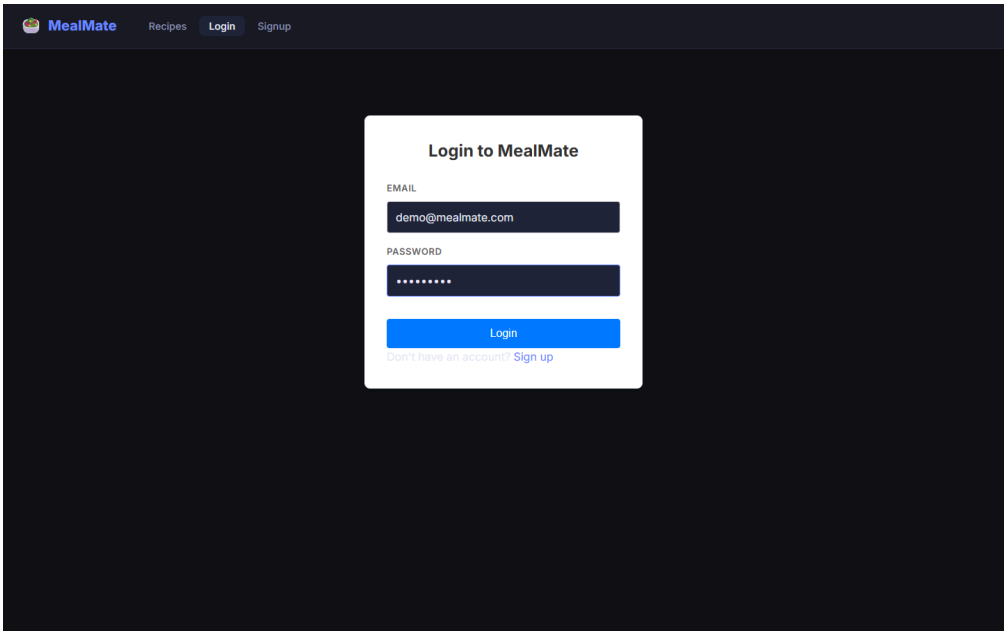
MealMate — Application Screenshots

The following screenshots capture the MealMate application running in its final state, meeting all functional and non-functional requirements.

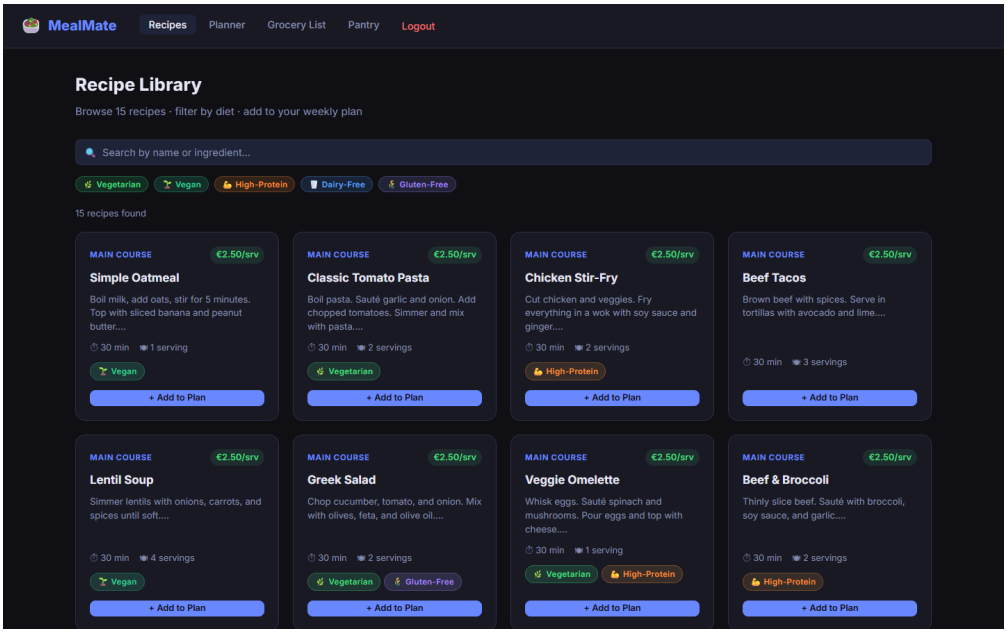
🔐 01. Login & Security

Stateless authentication gateway. Users must log in via JWT-authenticated credentials to access planning and inventory features.



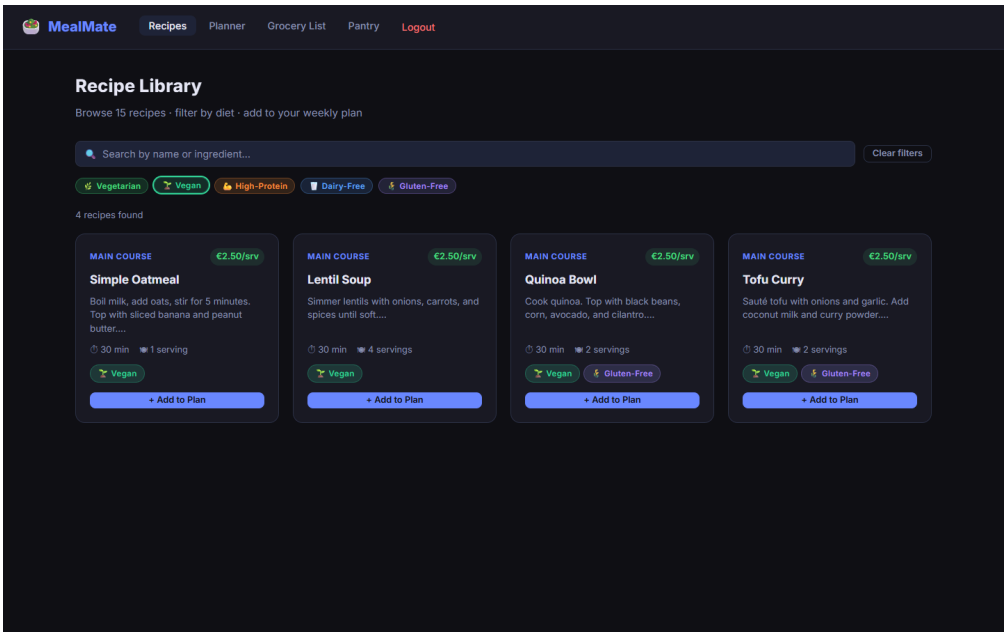
📖 02. Recipe Library (Public)

Guests can browse and search recipes with real-time text matching and category cards.



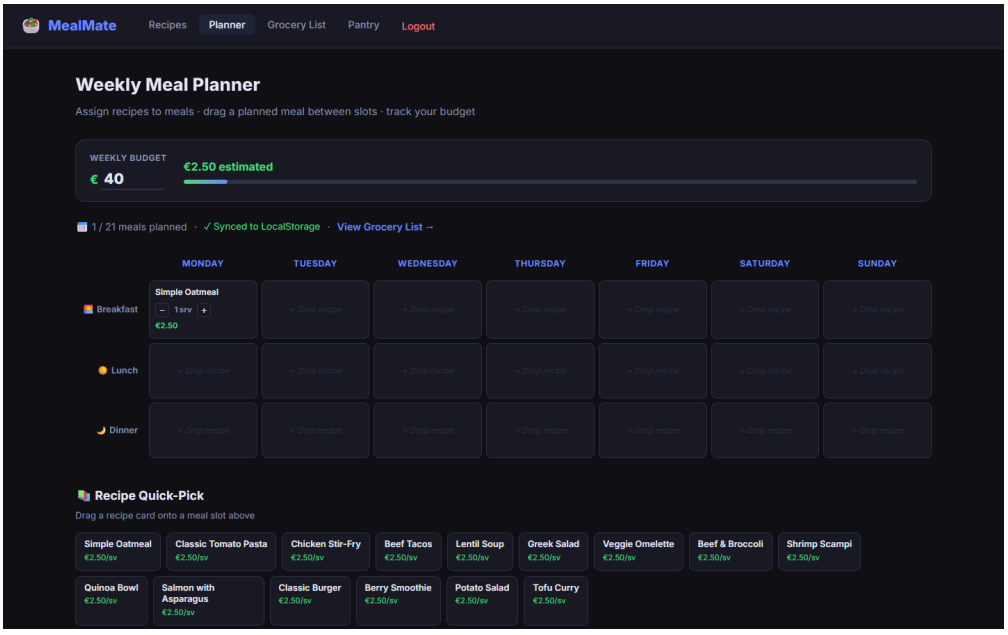
🥗 03. Dietary Filtering

Dynamic filtering engine allows users to narrow down recipes by Vegetarian, Vegan, High-Protein, and Gluten-Free tags.



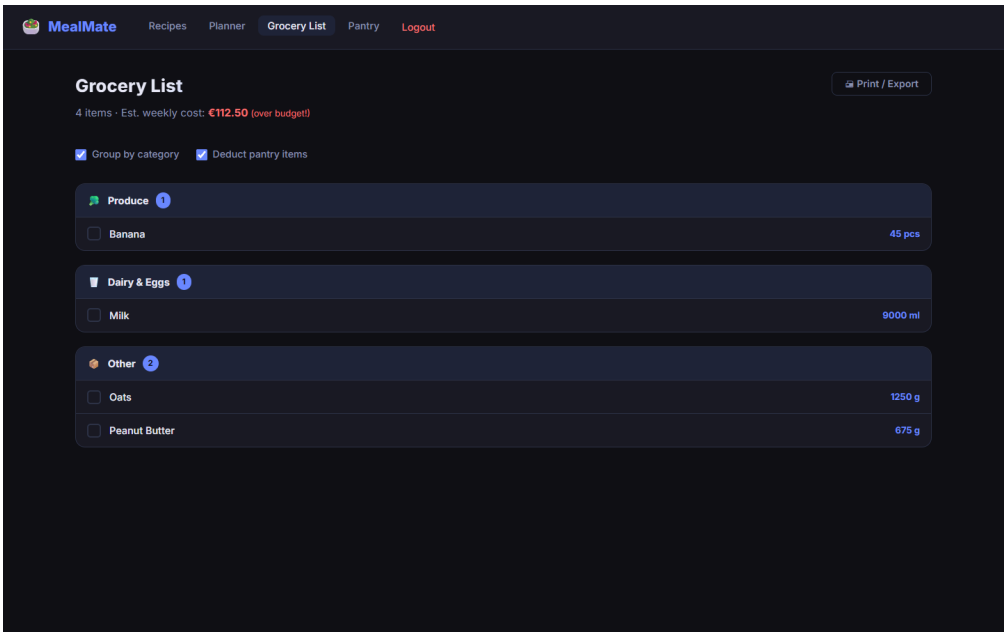
🗓️ 04. Weekly Meal Planner

Assign recipes to 21 meal slots per week. Drag-and-drop support (desktop) and per-slot serving adjustments with budget impact.



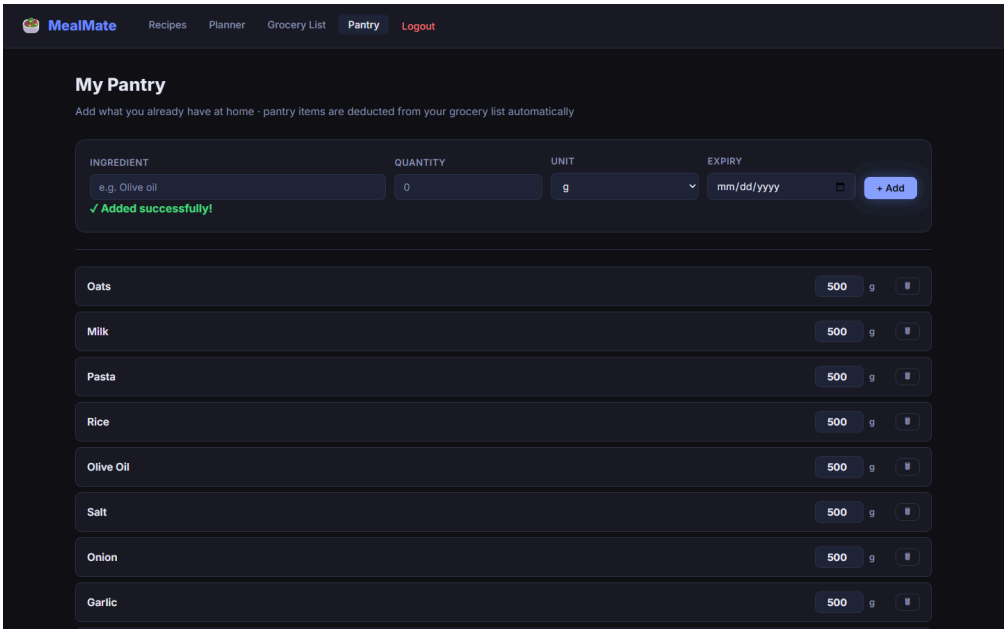
🛒 05. Smart Grocery List

Aggregated view of all ingredients needed for the week, with real-time budget tracking and automated pantry stock deduction.



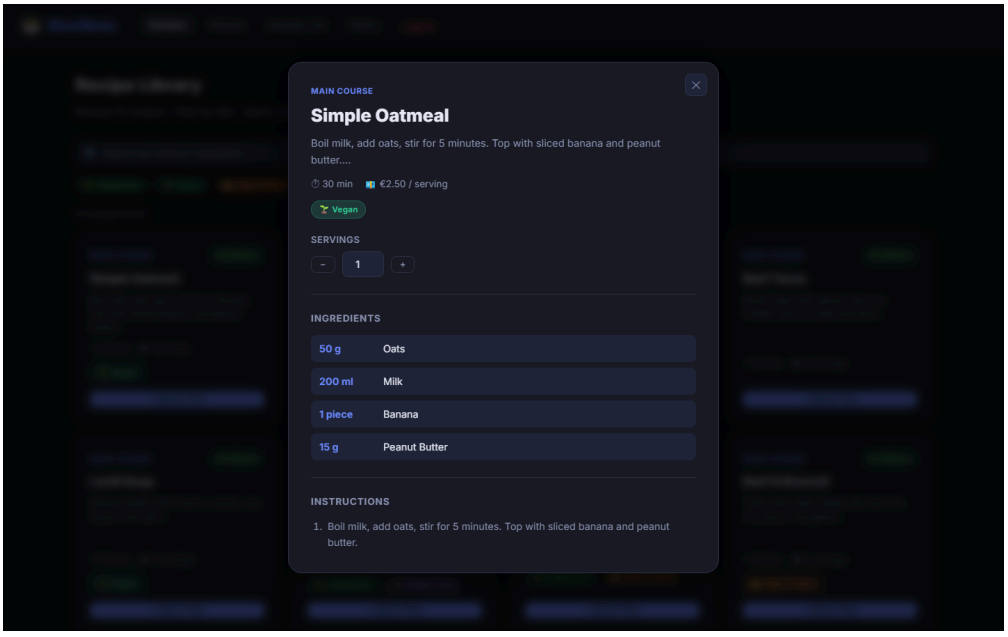
🥫 06. Pantry Manager

Manage kitchen inventory with expiry date tracking and ingredient autocomplete powered by the recipe database.



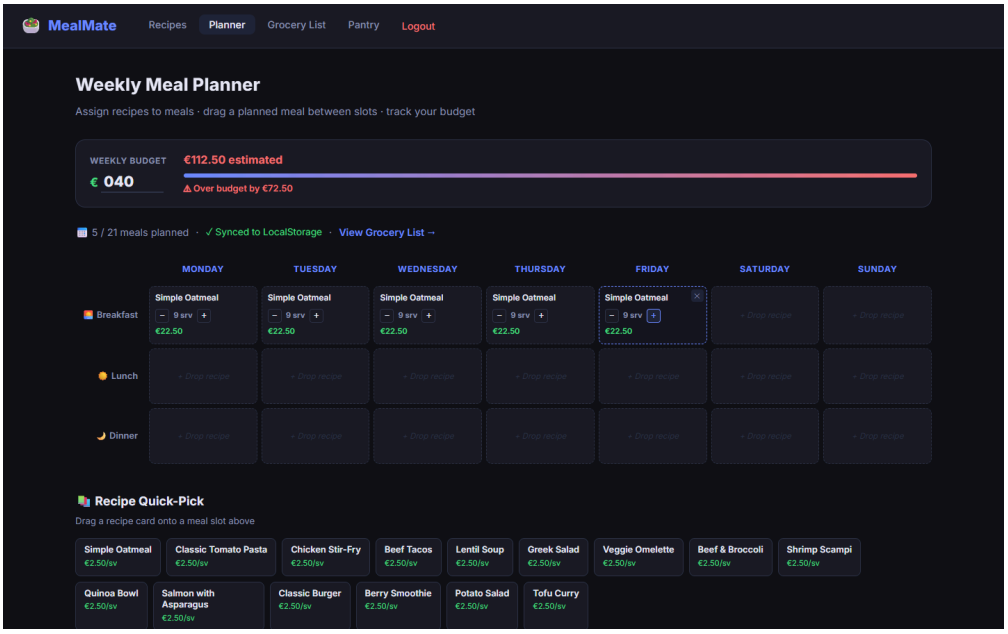
🍽️ 07. Recipe Details

Interactive recipe viewer directly accessible from the weekly planner or library.



⚠️ 08. Budget Alerts

Real-time budget tracking turns red to alert users when their planned meals exceed the configured weekly budget.



🖨️ 09. Printable Grocery List

A clean, ink-friendly export format for taking the aggregated ingredient list to the physical store.
